

# Corporate Presentation

January 2024

# Forward-Looking Statement

Certain statements included herein may constitute forward-looking statements within the meaning of the securities laws of certain jurisdictions. Certain such forward-looking statements can be identified by the use of forward-looking terminology such as “believes”, “expects”, “may”, “are expected to”, “intends”, “will”, “will continue”, “should”, “would be”, “seeks”, “anticipates” or similar expressions or the negative thereof or other variations thereof or comparable terminology. These forward-looking statements include all matters that are not historical facts. They include statements regarding Alphawave IP Group Plc’s (“Alphawave IP”) intentions, beliefs or current expectations concerning, amongst other things, its results in relation to operations, financial condition, prospects, growth, strategies and the industry in which it operates. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements are not guarantees of future performance and Alphawave IP’s actual results of operations, financial condition, and the development of the industry in which it operates, may differ materially from those made in or suggested by the forward-looking statements contained in this Presentation. In addition, even if Alphawave IP’s results of operations, financial condition, or the development of the industry in which it operates are consistent with the forward-looking statements contained in this Presentation, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that could cause those differences include, but are not limited to customer demand, Alphawave IP’s innovation and R&D and technology capabilities, target market trends, industry trends, customer activities and end-market trends, market acceptance of Group technologies; increased competition; macroeconomic conditions; changes in laws, regulations or regulatory policies; and timing and success of strategic actions. These forward-looking statements speak only as of the date of this Presentation. As such, undue reliance should not be placed on forward-looking statements. Other than in accordance with legal and regulatory obligations, Alphawave IP undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

# Founding Team and Track Record

## Alphawave Semi's Founding Team Has Supplied Connectivity Solutions For Global Tier-One Customers Since 1998

### Experienced Founding Management Team

**JOHN LOFTON HOLT**  
Executive Chairman, Founder

- >20 years of executive and investment experience

**TONY PIALIS**  
Chief Executive Officer,  
President, Founder

- >20 years of executive experience

**JONATHAN ROGERS**  
SVP Engineering, Founder

- >20 years of executive experience

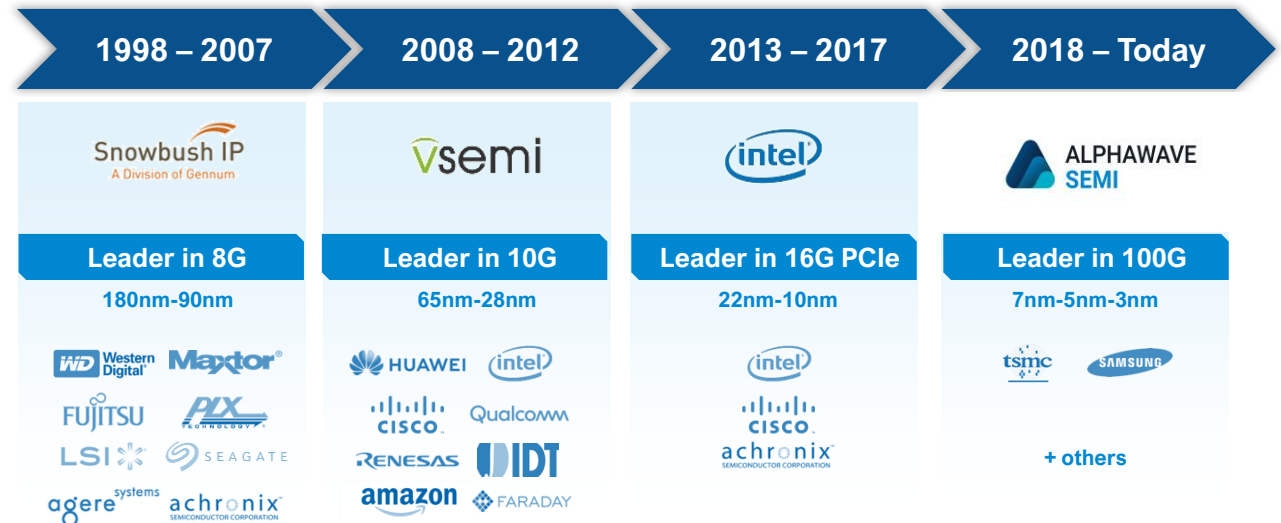

**RAJ MAHADEVAN**  
SVP Operations, Founder

- >20 years of executive experience

### Swift Success at Alphawave Underpinned by a >20 Year Track Record

- ✓ Members of the Management team have worked together for nearly two decades
- ✓ Technical team has developed in every advanced technology from 180nm → 3nm
- ✓ Communications products shipped to Tier-One customers globally since 1998
- ✓ Founders have raised and deployed \$300M across four successful semiconductor companies that have generated nearly \$3B of value since 2004

# The Age of Exponential Data Growth

More Sensors, Devices, Images and Multimedia... More Enterprise Data

<sup>1</sup> The Data Center Journey, From Central Utility To Center Of The Universe (semiengineering.com). Source Statista  
See slide 93 for all other references

# Addressable Market Expanding to \$18B by 2026

## Market Drivers

- Digitalisation drives exponential growth in data
- Data bandwidth doubles every 2-3 years driving a technology refresh of switches and transceivers
- High-speed and power-efficient connectivity technology is a key enabler
- Hyperscalers investing through the economic cycle

Semico Research Corporation, December 2022, IPNest and Lightcounting

# Alphawave Technology Strengths

## Leading Edge Capabilities and Technologies to Deliver the Fastest Connectivity Solutions

### High-Speed Connectivity IP

- 224Gbps, 112Gbps, chiplets
- **#1 TSMC OIP partner 2020-2022**
- **2022 Samsung Best Collaboration Award**

### Advanced Silicon

- First in 7nm, 6nm, 5nm, 4nm and 3nm

### Chiplet – Package Design

- Deep expertise in chiplet packages design
- 2.5D and 3D package designs in production

### Opto-Electronics

- PAM4, Coherent DSPs, and silicon photonics for 1.6T Ethernet
- 224Gbps photonics in silicon

# Data Connectivity Everywhere

## Our Expertise is in The Circuits and Systems Required to Communicate Data...

...Whether separated by kilometres of optical fibre or meters of copper cable, sub-millimetre printed wiring, the start- and end-points of data are silicon chips

### Inside Data Centers...

- Up to 76% of all data centre internet traffic traverses internally within data centres

### ...and at the Edge (5G rollout a major driver)

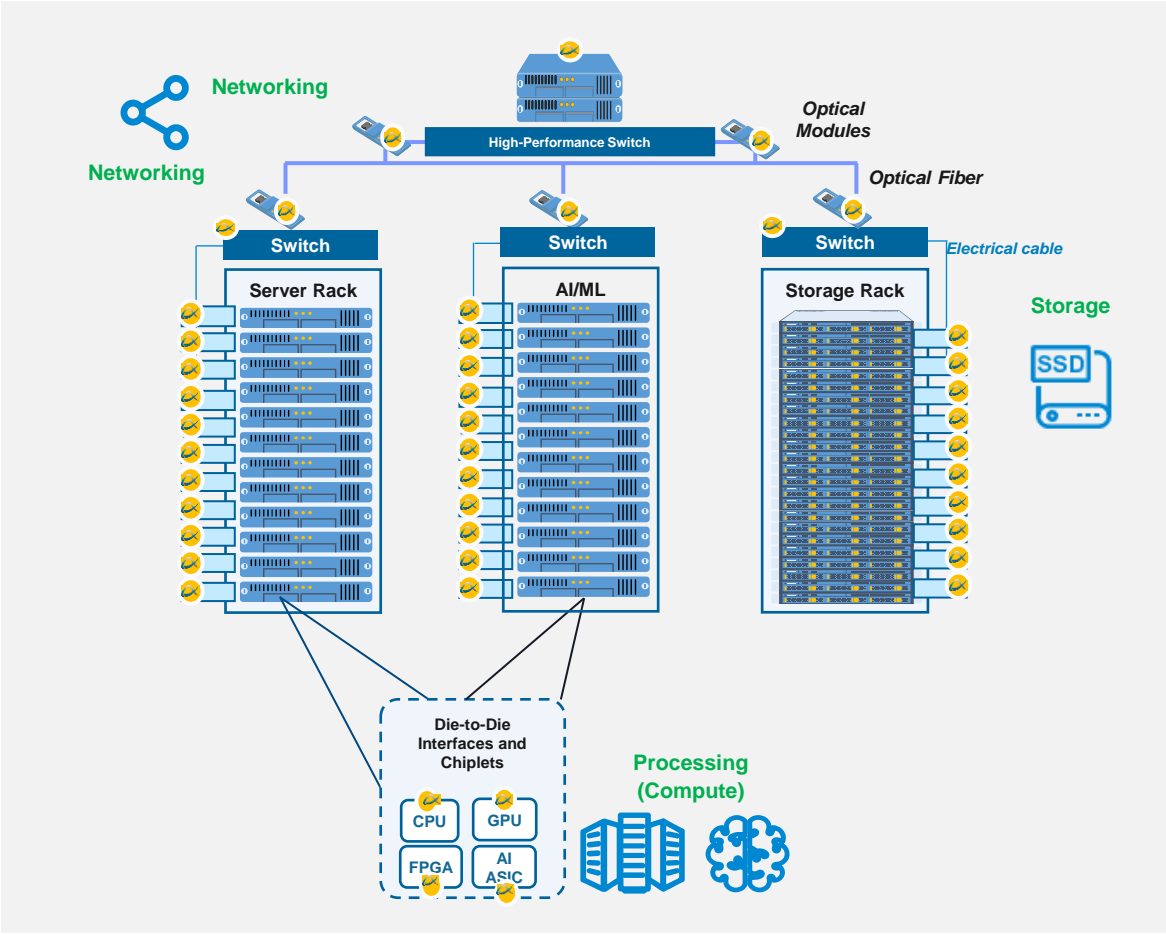

- Placing application-specific compute close to the sources of data
- Creating new applications for high-speed connectivity

# Our Technology Enables High-Speed Data Transmission

## In Key Applications Inside Data Centers

**Semiconductors are at the start and end points of any transmission of data**

	Applications	Where
Processing (Compute)	CPU, GPU, FPGA, AI	In Servers and AI/ML racks
Networking	Network cards (NICs), Switch, optical modules and cabling	In servers and AI/ML racks, switches, optical modules, and cabling
Storage	Solid State Drives (SSD), Flash Memory, Hard Disk Drives (HDD)	In storage rack

# Key Technology Trends

## Optics Getting Closer to The End Points

Increasing use of optical cables over copper and co-packaged optics for lower cost, power and latency

## Coherent Optical

Increasing use of coherent optical communication inside data centers to overcome the bandwidth limitations of optical components

## Disaggregated Computing

Disaggregation of compute and storage to increase efficiency

## Advances on CMOS Technology

Higher development and manufacturing costs of high-end semiconductors

## Chiplet

Emergence of the chiplet design paradigm

# Long-Term Technology Trends

## Today

- Emphasis on using copper connectivity wherever possible to keep costs low
- Computer and system designers select packaged electronic parts and wire them together on a custom circuit board
- Global and interconnected supply chain

## 10 Years

- Ubiquitous use of low-cost optical connectivity solutions, even over short reaches
- Complete systems designed and made by packaging multiple standard silicon chiplets within a few centimetres
- Complete on-shore ecosystem for integrated circuits, chiplets, advanced packaging

## Alphawave Semi is well-positioned to:

Extend and expand technology leadership

Deliver solutions for emerging optical connectivity

Offer complete custom silicon expertise and chiplet IP

Leverage solid relationships with major western companies and governments

# Drivers of Our Vision and Ambition

## Adapting to External Environment and Stage of Our Business

Maximising Value For Our Customers

Expand and Extend Technology Leadership

Greater Scale

## Building a Leading Connectivity Business

Land and Expand

High-Performance Silicon IP and Products

People and culture

Vertically Integrated

# Building a Leading Connectivity Business

## High-Performance Silicon IP and Products

- Leading edge connectivity IP
- Delivering the fastest connectivity solutions
- Complete set of products and expertise aligned to long-term market trends

## Vertically Integrated

- Monetising our IP through IP licences, custom silicon and connectivity products
- Greater scale
- Enhanced competitive position

## People and Culture

- Technology-centric, open and diverse culture fosters innovation
- Approximately 700 employees
- Key design centres in Canada, US, Israel and India

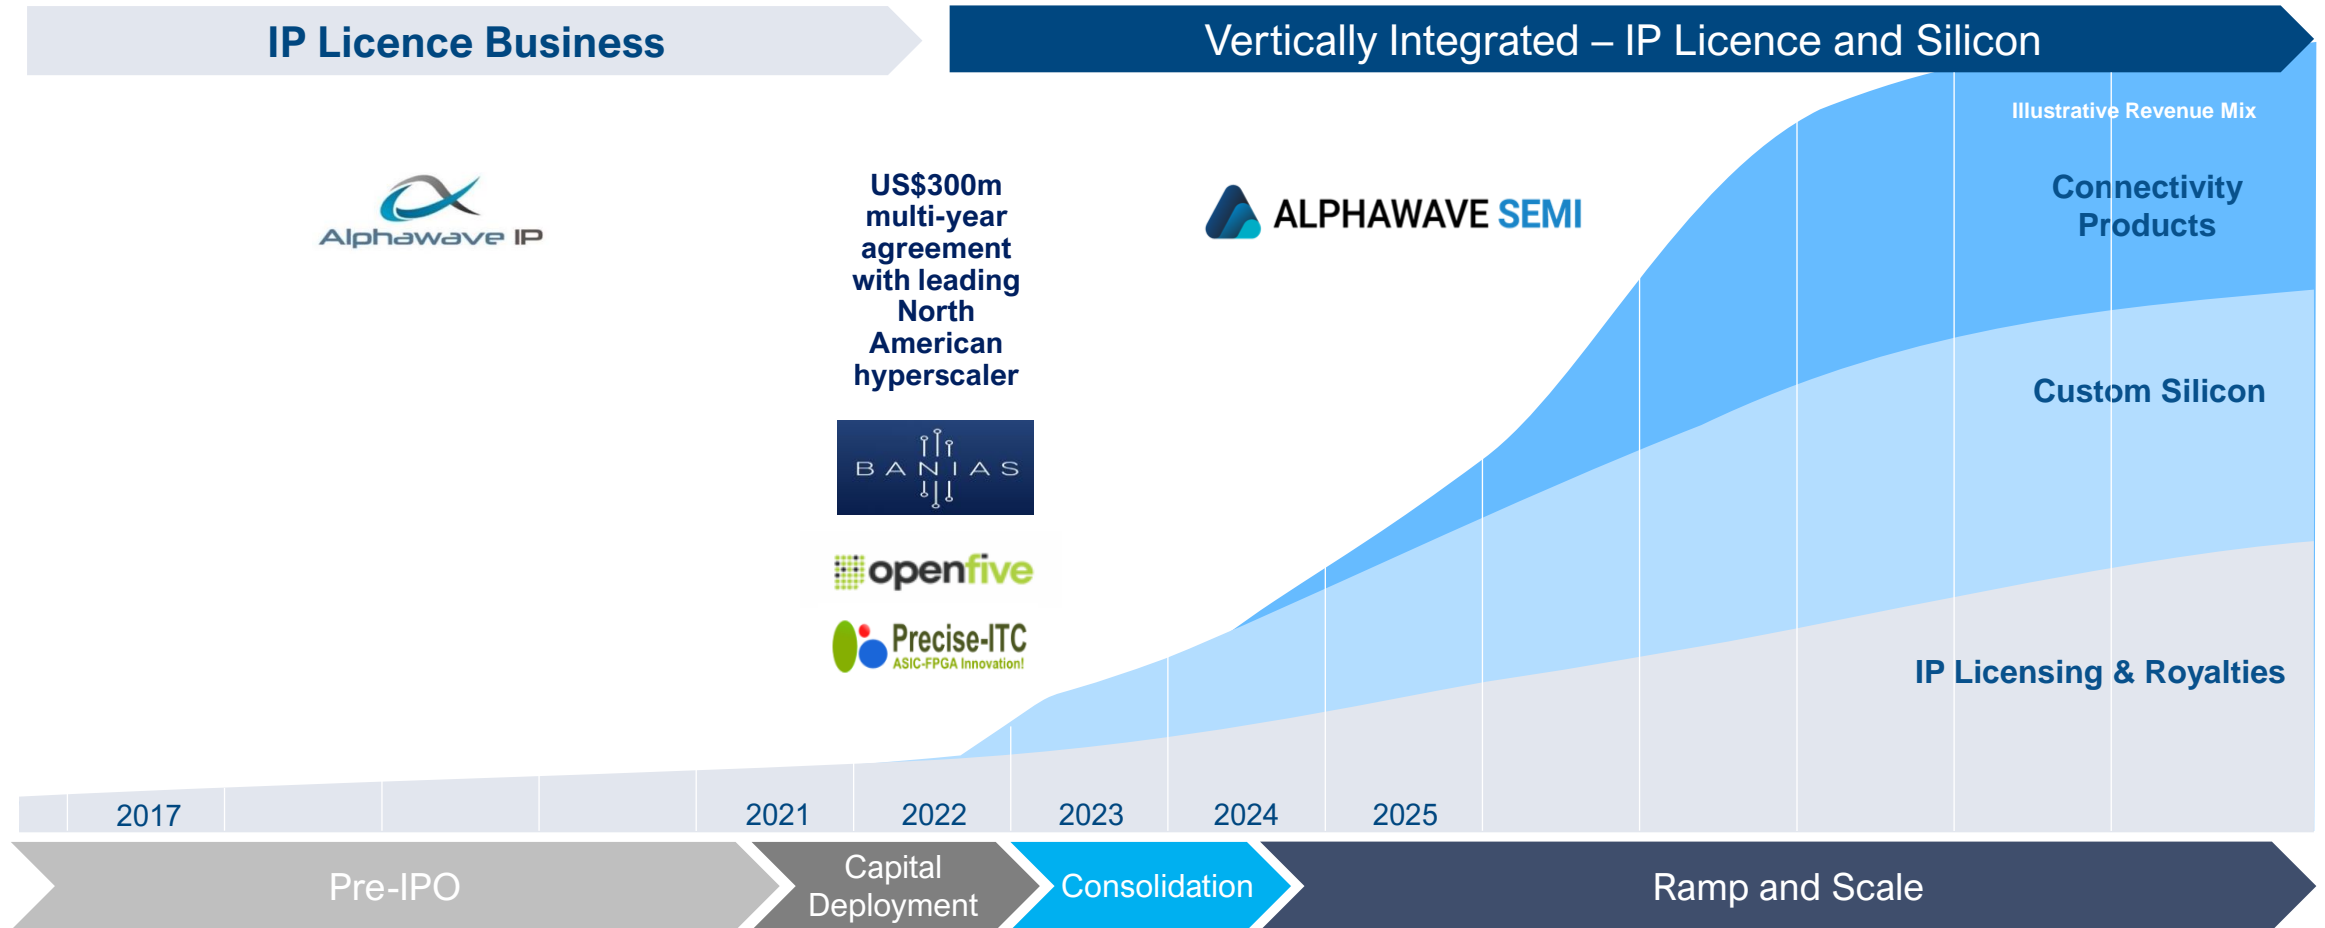

## Land & Expand

- Adding value to customers by servicing more of their connectivity needs
- Growing opportunity with large cloud, wireless infrastructures and hyperscalers
- Collaborative approach with customers promotes innovation

# Leading Connectivity Technology for Digital Infrastructure

## Vertically Integrated - Monetising our IP Through IP Licence and Silicon

# Growth Strategy Built on a Broad Product Portfolio

## Leading Connectivity IP and Silicon

# Connectivity Silicon IP

## Servers and Storage

High-speed Interface IP for data centre compute – CPU, GPU, AI & FPGA

PCIe Gen6 / CXL 3.0

PipeCORE PicoCORE  
KappaCORE

## Networking

Interface IP for Networks – Switches, Routers, DPUs, NICs

400G, 800G, 1.6T Ethernet

AthenaCORE ApolloCORE  
ZeusCORE AlphaCORE OmegaCORE

## Memory

Memory Interface IP for DRAMs & HBM – CPU, GPU, AI, FPGA, DPUs

HBM, LPDDR, DDR

HelenaCORE DemiCORE

## Chiplets

Chiplet Interface IP 2.5D and 3DIC

UCIe, BOW, Open-HBI

AresCORE DieCORE  
GammaCORE

# Custom Silicon

## Silicon Proven Solutions Leveraging Our High-Performance IP

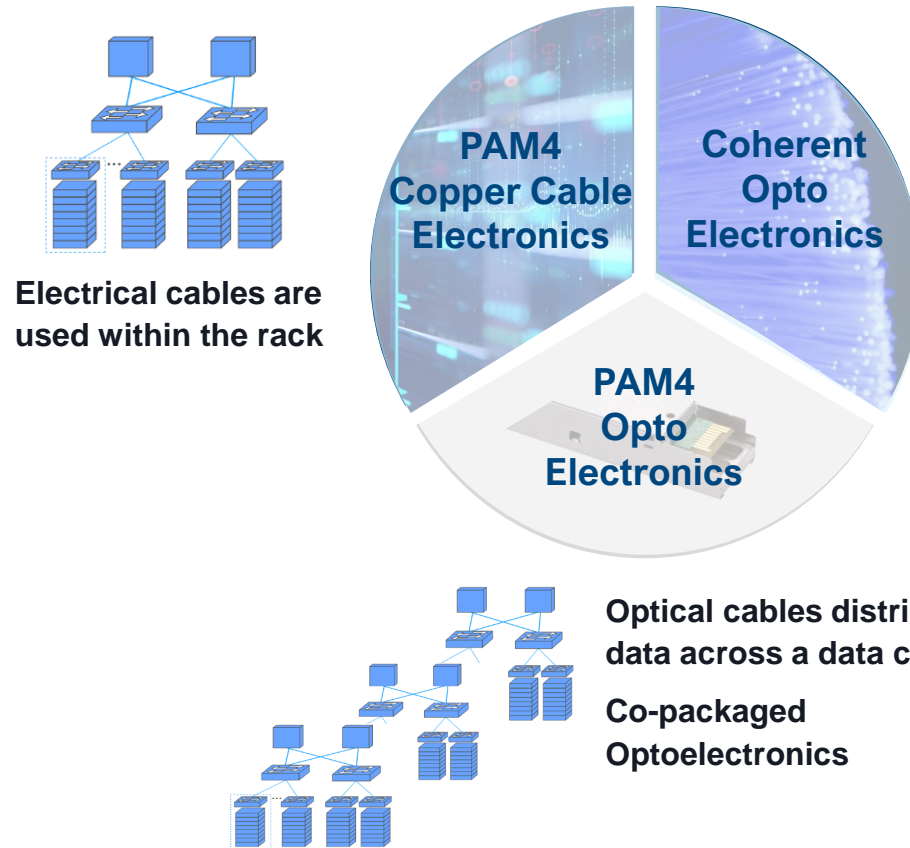

## Strong Partnerships Across the Supply Chain

# Connectivity Products

## Full Range of PAM4 and Coherent DSPs – Electrical and Optical

Direct Detect modulation such as **PAM4 DSP** for speeds up to 200G

**Coherent DSP** for longer reaches and for shorter reaches at 200G and above

# Adding Value to Customers - Land & Expand

## Servicing More Connectivity Requirements

Number of Revenue  
Generating End-Customers

20

85

FY 2021

H1 2023

- Technology refresh/upgrade provide an opportunity to work with new customers
- Once technology is qualified and deployed is easier for customers to increase adoption
- Close R&D collaboration with customers drives product development
- Hyperscaler multi-year agreement provides unique platform to develop new products and scale the business

# People and Culture

## Attracting Talent and Creating an Environment to Foster Leading Innovation

- Attracting and retaining talent:
  - Employee share ownership aligned to shareholder's interests
  - Working on leading edge technology
  - Supporting employees' wellbeing through period of accelerated business expansion
- Technology-centric culture focused on solving the hardest challenges
- Promoting an open and diverse environment to foster innovation

~20% Female

744  
Employees  
30 June 2023

# Our Commitment to ESG

## Building the Team to Support a Responsible Business Expansion

- ESG Steering Group to drive improvements and long-term sustainability strategy

### Environmental

- Our products contribute to more sustainable data centers
- Fabless business model with relatively lower carbon footprint
- Ongoing commitment to actively manage and reduce our carbon footprint
- Environmental disclosures following TCFD recommendations

### Social

- Talent identification and retention programme
- Commitment to Diversity & Inclusion
- Corporate values fostering innovation and the next wave of innovators
- University Relations, Internships, and Community Engagement programme

### Governance

- Responsible Company – adhering to high standards as per our Code of Ethics and Business Conduct
- Increasing focus on Supply Chain Governance
- Head of Governance driving further improvements

# Recent Company Announcements

Alphawave Semi Partners with Keysight to Deliver Industry Leading Expertise and Interoperability for a Complete PCIe 6.0 Subsystem Solution

12.14.2023

Alphawave Semi Named One of Canada's Enterprise– Industry Leaders Winners in Deloitte's Technology Fast 50™ Program

11.08.2023

# H1 2023 Bookings up 251% Year-on-Year

## 75% of IP & NRE Bookings in Advanced Nodes

### Bookings (US\$m)

### Split by Business

### By Quarter (US\$m)

### Licence & NRE

- Main contribution from North American customers
- Increased contribution from EMEA and APAC
- First 3nm custom silicon design win with 224G Ser-Des IP enabling 800G/1.6T connectivity
- Design win with a leading APAC customer for our leading Gen6 PCIe SerDes and Controller IP

### Royalties & Silicon

- Mainly driven by orders from Chinese and North American customers

# H1 2023 Revenue up 228% Year-on-Year

Revenue Outside of China US\$63m up 79% Year-on-Year

Revenue (US\$m)

Revenue (US\$m)

H1/H2 Split by Business (US\$m)

## Licence & NRE

- Growth mainly driven by multi-year contracts

## Royalties & Silicon

- Approximately  $\frac{3}{4}$  from Chinese customers related to pre-existing custom designs in production

North America +134% YoY

**H1 2023 Gross margin at 44%** reflects business mix including legacy silicon revenue from OpenFive

# Backlog US\$366m

Large Diverse Backlog Drives Stability and Predictability With 18+ Months of Visibility

<sup>1</sup> Including backlog from OpenFive and Precise-ITC of approximately over US\$100m

# Investing In Future Revenue Growth

## Operating Expenses Reflect Increased Headcount

- Increased headcount from 251 to 744
  - Approximately 350 employees from the acquisitions of OpenFive and Banias Labs
- R&D - increased headcount and some additional IT/SW tooling required
  - US\$24.7m R&D expenses capitalised in H1 2023 (H1 2022: US\$nil)
  - US\$6.3m amortisation of acquired intangibles
- G&A – building finance, legal and HR functions
  - Includes US\$4.1m of deferred compensation payments related to acquisitions
- Other expenses/(income) in H1 2022 include a US\$19.3m exchange gain
  - H1 2023 SBP US\$18.5m (H1 2022: US\$7.2m)

Closing HC	H1 2023	H1 2022
R&D/Engineering	662	220
G&A	60	22
S&M	22	9
Total	744	251

Due to rounding, numbers presented in the chart may not add up to the totals provided.

# Higher Adjusted EBITDA Reflects Increasing Scale

## Adjusted EBITDA Margin Reflects Business Mix and Investment in Growth

- EBITDA<sup>1</sup> in H1 2022 included US\$19m exchange gain
- **Adjusted EBITDA of US\$32.4m, 40% over H1 2022**
- Adjusted EBITDA margin of 17% reflects:
  - Acquired legacy custom silicon revenue at low margin
  - Investment in capabilities to support our pipeline of opportunities
- Adjusted diluted EPS of \$2.20
  - Higher adjusted operating profit
  - Higher share count

### EBITDA (US\$m)

### Adjusted EBITDA (US\$m) and margin

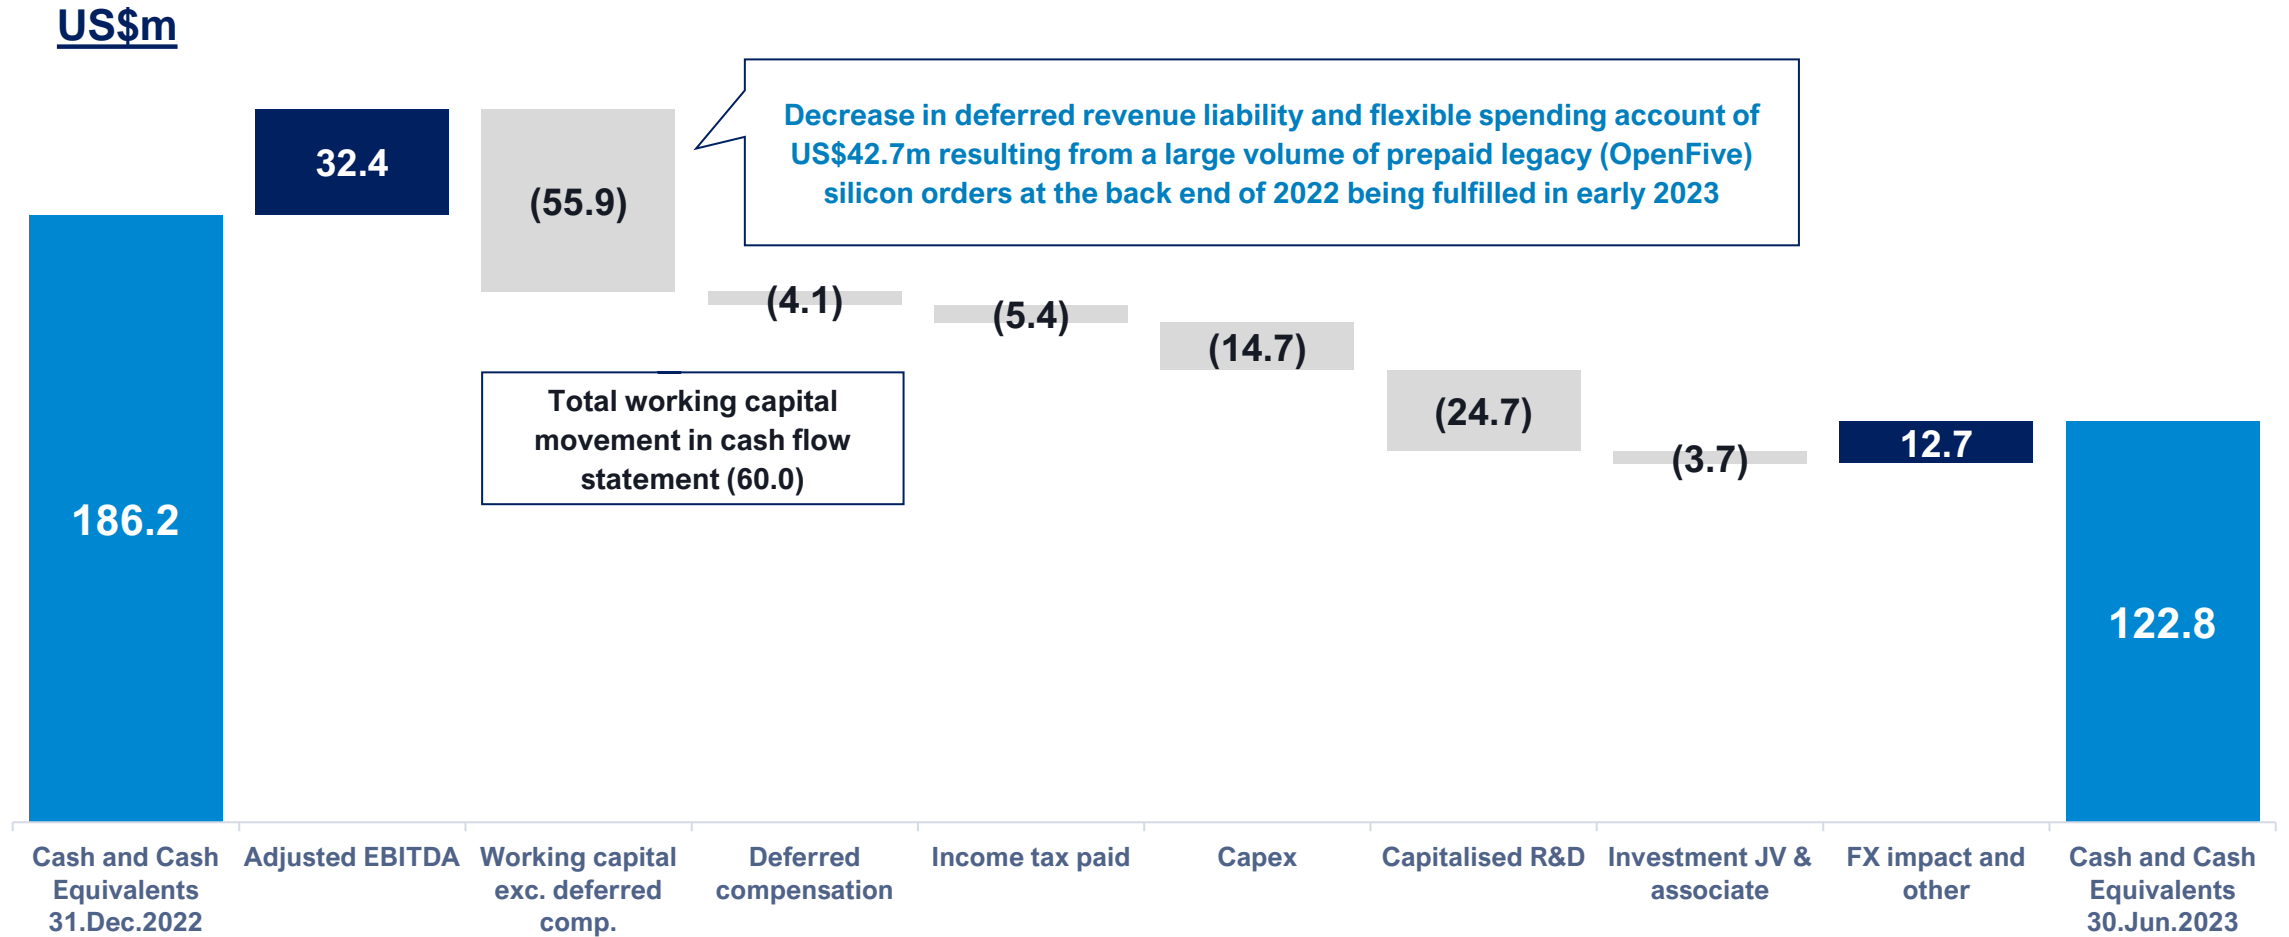

### Adjusted Diluted EPS US\$
